

Discontinuous Panel Production Line

About MEKO

MEKO is building high-quality sandwich panel machines at the German and Korean levels that combine mechanical engineering expertise with innovative technologies in Istanbul, Turkey, with Korean engineers.

MEKO's mission is to make high-quality machines that are precise and durable by competent Korean engineers with 30 to 40 years of experience in this field, and to make machines that satisfy customers 100%.

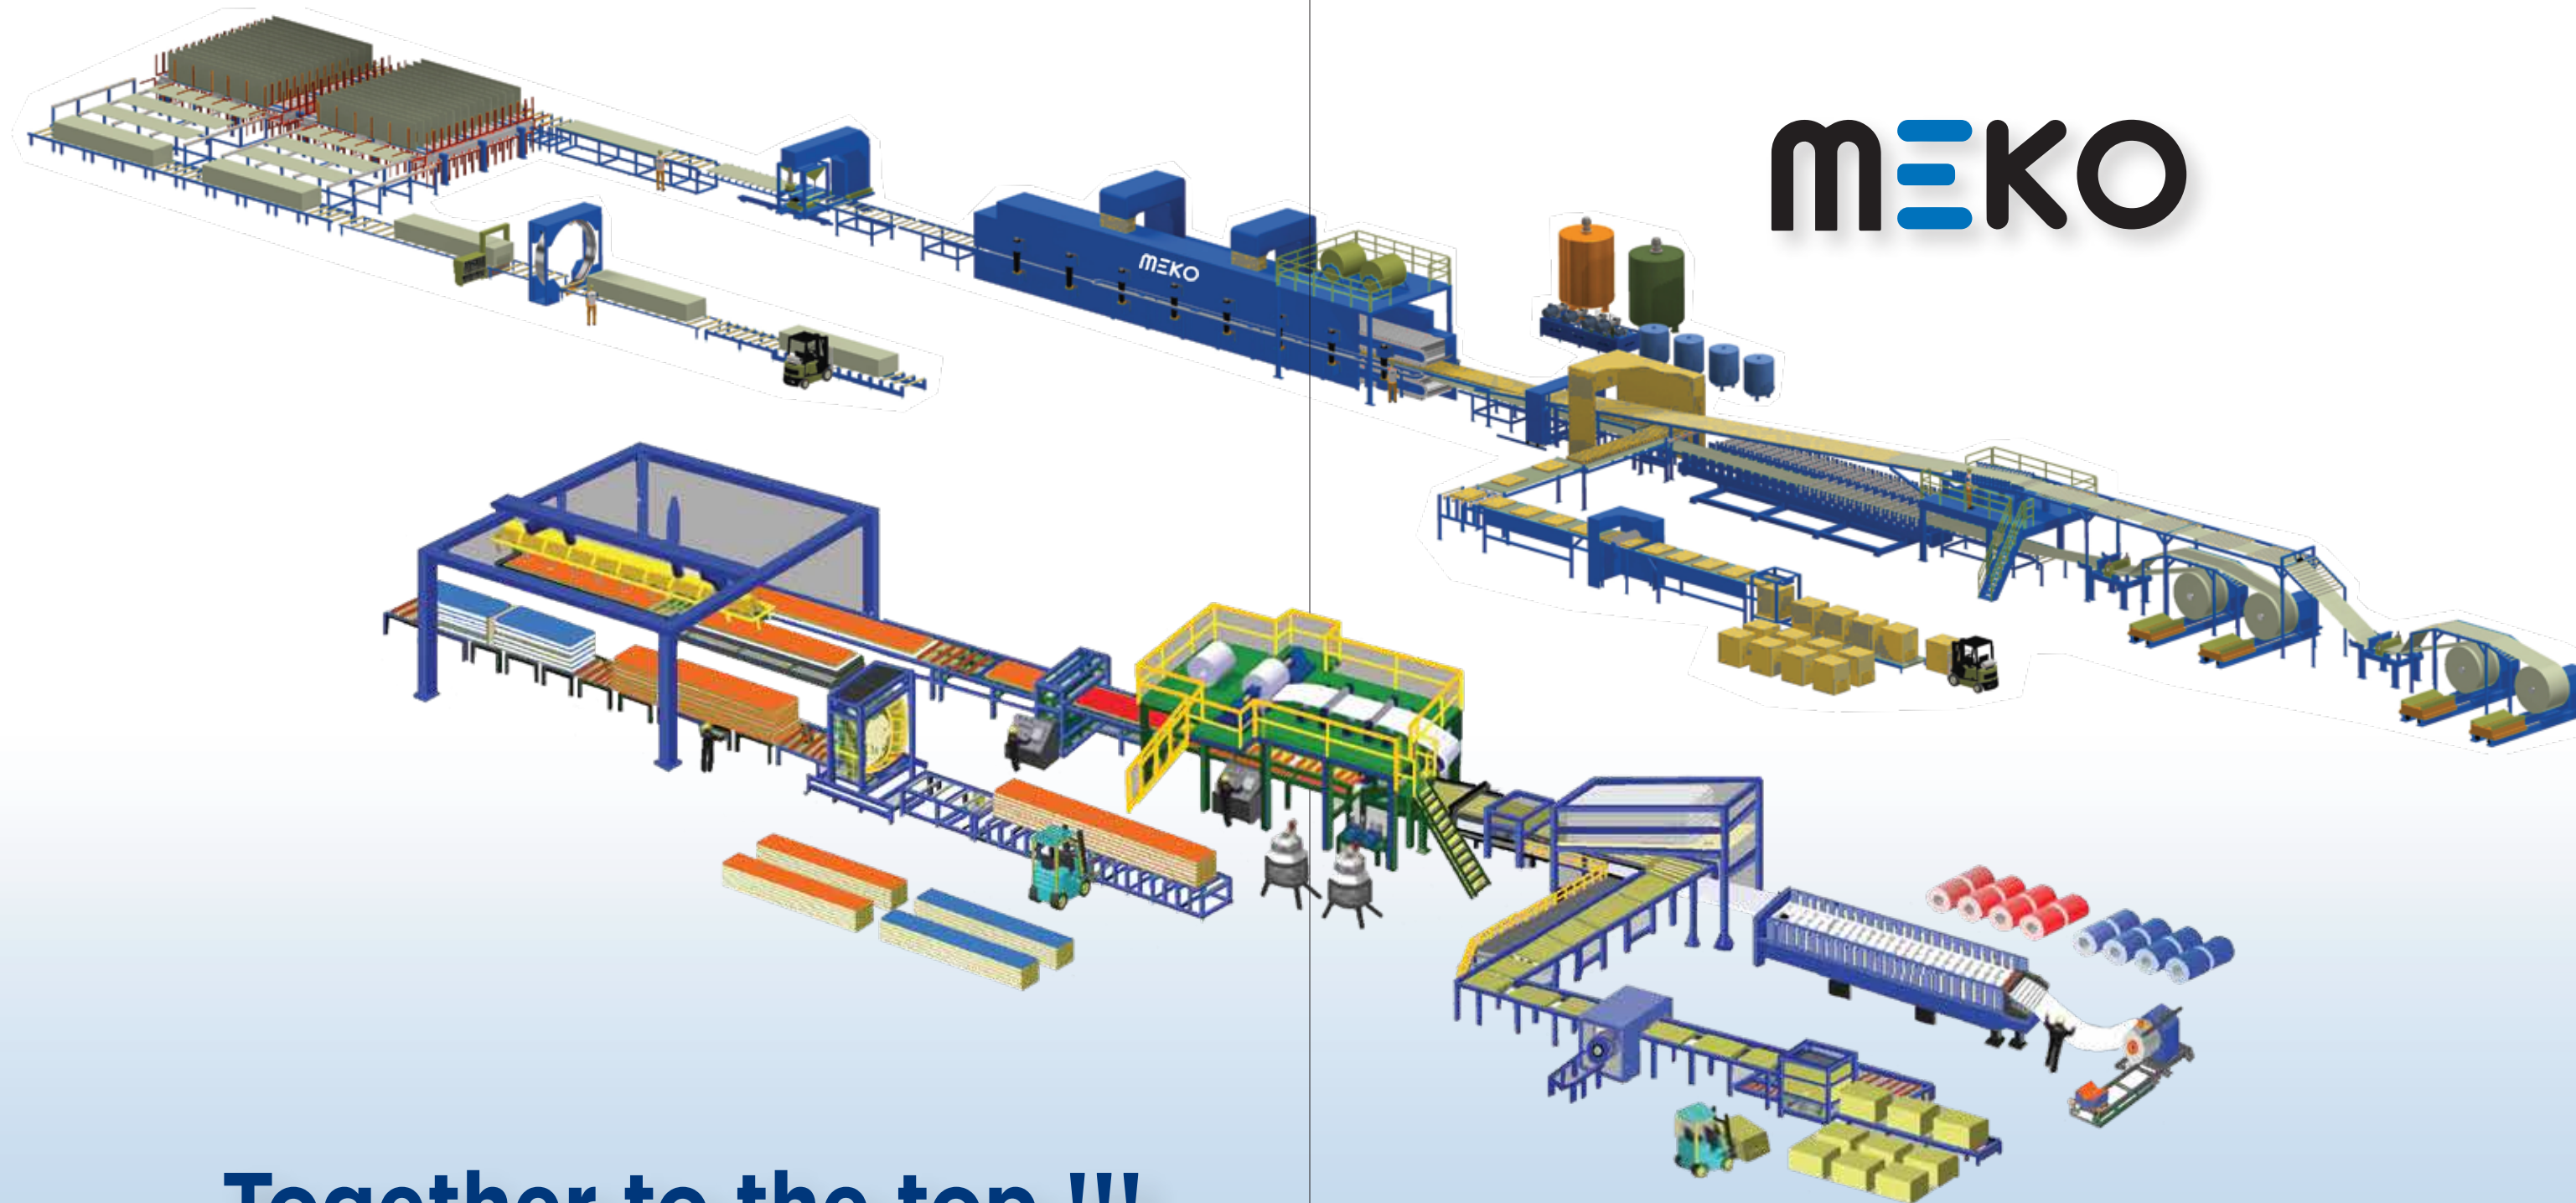

MEKO's goal is to leverage the highest level of technology and expertise to deliver the highest level of machines to ensure customer success.

The core value of MEKO is centered on quality, innovation, and trust.

Thank you for your interest in our company.
MEKO will do its best to contribute to your business success.
